

Demonstration of Proposed Features

Date	06 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrate d (Yes / No)	Remarks
1	Text Emotion Detection	Detects student emotions from text input using BiLSTM and BERT models.	Implemented	Yes	Successfully predicts emotions with confidence scores.
2	Dual Model Prediction	Compares emotion predictions from both BiLSTM and BERT models.	Implemented	Yes	Improves prediction transparency and reliability.
3	Mixed Emotion Detection	Identifies multiple emotions present in the student's text.	Implemented	Yes	Displays primary and secondary emotions.
4	Personalized Learning Guidance	Generates emotion-aware learning guidance using Google Gemini.	Implemented	Yes	Provides supportive and subject-specific recommendations.
5	Analytics Dashboard	Displays emotion trends, confidence scores, model comparison, and subject-wise analysis.	Implemented	Yes	Interactive visualizations using charts.
6	History Management	Stores previous analyses in CSV format and allows users to review and download prediction history.	Implemented	Yes	Supports tracking of previous interactions.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
