Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

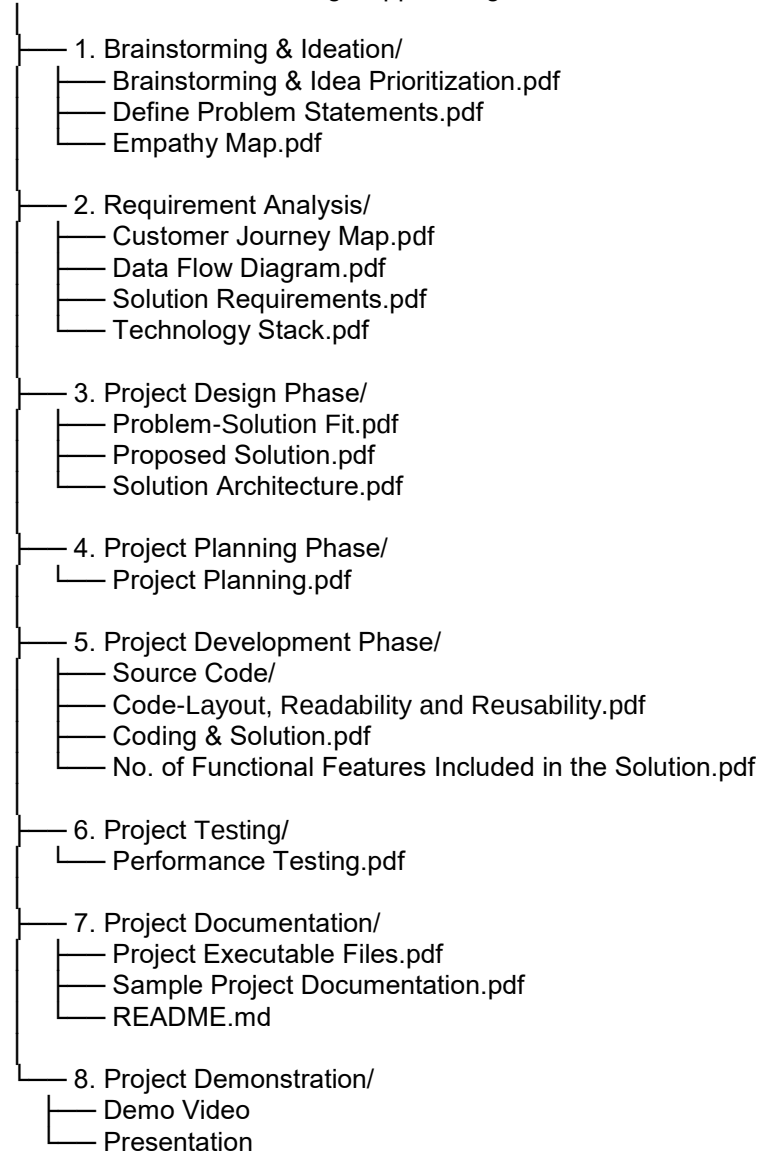

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Emotion-Detection-Learning-Support-Engine/

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://emotion-detection-learning-support-engine-project-hyft4alehytr.streamlit.app/
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Streamlit Community Cloud
Repository Link	https://github.com/AP24110011110/Emotion-Detection-Learning-Support-Engine-PROJECT
Demo Video Link	https://drive.google.com/file/d/1B61Mvg4AHNICJfYoll1s0MaDjMEqNZJG/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 1:

Clone the repository:

```
git clone <Your GitHub Repository URL>
```

Step 2:

Navigate to the project directory:

```
cd Emotion-Detection-Learning-Support-Engine
```

Step 3:

Install the required dependencies:

```
pip install -r requirements.txt
```

Step 4:

Configure the environment:

- Create a .env file (if required).
- Add your Gemini API key.

Step 5:

Run the application:

```
python -m streamlit run app.py
```

Step 6:

Open the local URL displayed in the terminal (usually <http://localhost:8501>) or access the deployed Streamlit application.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI response time depends on internet connectivity and Gemini API availability.	Stable with a reliable internet connection.
2	Prediction accuracy depends on the quality and clarity of the user's text input.	Encourage users to provide clear and detailed descriptions.
3	The system currently supports only predefined academic subjects.	Additional subjects can be added in future updates.
